

Mariana Islands - KH0 KH0/JI3XRZ and

KC6OPD/WH0 will be active on SSB from Saipan (OC-86) Feb. 9-11. KC6OPD/NH0 will be the CW callsign. Suggested frequencies are 3503, 7003, 10103, 14010/027, 18075, 21010/027, 24900, and 28010 kHz on CW, and 3799, 7075, 14180/225, 18135, 21250/305, 24950, and 28480/540 kHz on SSB. They will also be on 6 meters: 50120 kHz. QSL to JF2KOZ. Sunrise 2042Z; sunset 0810Z. (Thanks Japan DX News.)

Niue - ZK2 Miki HA8XX and Eli HA9RE are now active as ZK2XB and ZK2XA (OC-40) respectively, probably for another week or so. Try 7007 kHz at 0800Z, 3505 kHz at 0900Z, and 28485± kHz at 2200Z. QSL to DJ1ND, with separate return envelopes for each different DXCC country of operation. Donations are very much appreciated. Sunrise 1700Z; sunset 0545Z.

Edited by Chod Harris VP2ML

The DX Bulletin

America's Premier Weekly Amateur Radio Publication

Mozambique - C9 DF3EC has been very active as C9EC. He may be there a few more days. Try 3505 kHz at 0230-0330Z, 7005 kHz at 0100Z, 14025 kHz at 2330-0030Z, 21025 kHz at 2230-2330Z, and 28025 kHz at 16-1900Z. On the new bands, try 10101 kHz at 0000Z, 18077 kHz at 21-2200Z, and 24906 kHz at 1600Z. QSL DF3EC.

Barbados - 8P Pete Cross W0SA is active on CW only as 8P6NX (NA-21) to Feb. 13, 160-10 meters. Try 14013 kHz at 01-0330Z. QSL via home call.

St. Lucia - J6 Bill O'Kain K4LTA and his wife Ruby N4FKO will once again operate as J6LTA and J6LSW (NA-108) for several weeks, beginning Feb. 13th. Look for J6LTA on 3504, 7004, 7024, 10101, 14024, 18070, 21024, 24898, and 28024 kHz, and J6LSW on 14195, 21295, and 28467 kHz. They will be active in both modes of the ARRL DX Test. QSL to NI4M.

Shortly Noted

■ **XQ0X** on San Felix (SA-13) continues to be very workable, especially on 14236 kHz 02-0430Z, often listening up, and by call areas. He also likes 28495 kHz 16-2000Z Sundays. QSL to CE3ESS.

■ **T31KY** (OC-43) is also very active. Kiyoko is often on 28490 kHz at 21-0015Z, and 14180 kHz at 0400Z, listening up. QSL route is in Issue 572. She won't QSL any of her Pacific operations until her return to Japan.

■ **ST0DX**: Dennis prefers net operations, especially those on 14160 kHz and 14256 kHz. However, he occasionally operates free-lance on 14180 kHz at 1845Z. QSL in April to WB2WOW. WB2WOW is soliciting donations for Dennis, including rigs and antennas to be left in Southern Sudan.

■ The **XF0C** operation from Clarion Island (NA-115) in the Revillagigedo group was apparently delayed. Look for them Feb. 3-20, depending on transportation. QSL to Hector Espinosa Flores, Box 231, Colima 28000 Mexico.

■ **H61T** is the contest call of YN/SM0OIG in 1991. QSL to SM0KCR, as usual.

■ **4K1ZI** was logged at 28004 kHz at 2250Z on Jan. 16. The 4K1-I block is used by Soviet stations operating from the South Sandwich Islands (AN-09). Operator said to QSL to RB5JBU.

■ **NT2X** is not the QSL route for YA0RR. Ed is returning any QSLs sent to him. Use the proper QSL address: Romeo Stepanenko, Box 812, Sofia 1000, Bulgaria.

■ **OJ0/KF7PO** and **OJ0/N7BG** QSL cards are going out this week. Second requests to QSL manager KF7PO will only delay response; please be patient.

■ **UM9QWC** (or some special call) will commemorate the 15th anniversary of the Edelweiss ARC. Try 3645, 7045, 14245, 21245, and 28445 kHz. QSL to UM8QDX. (DXNS.)

■ The **CT** contest logging program now costs \$40, from Bill McGowan KC1EO, 33 Truell Road, Hollis NH 03049.

■ **SSB Net** check-ins: **7159 kHz**: XQ0X; **14160**: ST0DX RA0AL (Zone 18) 9L3GB VP8CEO (Falklands) TR8AHO UA0QCA JW6WDA JW0GB FT4WC; **14222**: CT3CU A71CD 4S7EF; **14227**: VP8CEO J5CVF EP2MM 4K2/UV3CC FK8GF EA8BPH TU2PA 5U7NU VQ9HW T20AA; **14256**: ST0DX 5N6ZHM 9Q5BG; **21335**: 7P8DF 7P8EB C31LHK SV2ASP/A (Mt. Athos) 4K2/UV3CC OY9JD ZD9CS AP2JZB VQ9AY ZD9BV 3B9FR 9L2DG.

■ **Islands On The Air**: **Y26FA** will be on Rugen Island (EU-57) Feb. 16-17; try 28030 kHz at 16-1700Z. He may also go to Poel Island (EU-98) on Feb. 19. Ralph Hirsch will be **K1RH/1H0** from St. Helena Island (NA-110) Feb. 7-15; QSL home call. The first DXpedition to Itamaraca Island (SA-46) is scheduled for Feb. 1-3; usual DX and IOTA frequencies. Callsigns are **ZY7TR** on SSB, **ZY7EK** on QRS CW, and **ZY7EH** on CW. QSL to Ronaldo Bastos Reis PS7AB, Box 2021, Natal RN 59081, Brazil, with US\$1.50 or two IRCs (US\$1 doesn't cover airmail postage from Brazil to the US.) **ZW0MI** will be active Feb. 9-17 from Mel Island in the Parana State group (SA-47), operated by the Araucaria DX Group. QRZ DX says that **YY5P** will be active from Patos Island (near Trinidad) Feb. 9-11, all bands. Patos isn't in the IOTA directory.

Propagation Watch

Don't write off Sunspot Cycle 22 yet! Solar activity increased dramatically at the end of January, with solar flux soaring above 300. In spite of some Class X (major) flares, the geomagnetic field remained quite stable. The combination of 300+ flux and quiet geomagnetic conditions produced fantastic propagation on all bands, 80-10 meters.

The sun is showing a pattern of activity similar to its behavior in early 1990: a couple of months of relatively stable flux, followed by an enormous increase in activity. Last year a major flare in mid-March totally wiped out the HF bands, and produced aurora in tropical latitudes. So far, DXers have enjoyed the positive effects (better high-band conditions) without suffering the negative (geomagnetic storms).

The very high levels of solar flux increase ionization in the upper atmosphere, which increases signal-to-noise ratios on the higher bands during the day, and permits multi-hop propagation, including very long hauls, and long-path openings. Meanwhile, the quiet geomagnetic field means good low-band openings at night, including excellent westward openings at local dawn.

Unfortunately, these superb conditions are unlikely to last long. Sunspot region 6471, which produced an X-class flare on Jan. 27, will probably produce more major flares. Regions 6462, 6466, and 6473 may also erupt at any time, with potentially disastrous effects on HF propagation. Make the most of the great band conditions before flares send geomagnetic activity soaring.

New US Postal Rates

Effective Sunday, February 3, postage rates in the US will increase. Both US and foreign DXers should make note of the following new rates:

In the US: regular first-class postage increases to \$0.29 for the first ounce, and \$0.23 for each additional ounce. The temporary "F" stamps may be used in the US only. Mail bearing "F" stamps addressed outside the US will be returned to the sender. Post cards, including QSL cards, will cost \$0.19 to mail.

To Canada: a standard one-ounce letter to Canada requires \$0.40 postage, up from \$0.30. However, this new rate supposedly includes airmail service within Canada. Use airmail envelopes, and write 'Air Mail' in large, red letters on Canada mail to take advantage of the promised faster delivery. Additional ounces after the first ounce cost \$0.23 each. Post cards to Canada cost \$0.30. Again, write 'Air Mail' on the cards for better service within Canada.

To Mexico: a half-ounce standard letter requires \$0.35 postage, again with airmail service within Mexico (if your envelope says Air Mail clearly enough). Each additional half ounce cost \$0.10, to 2 ounces. Then additional ounces cost \$0.25 more each. Post cards to Mexico cost \$0.30.

To all other countries: standard air-mail rate is \$0.50 per half ounce. The second half ounce costs \$0.45 more, and each additional half ounce after two costs \$0.39 each. Post cards cost \$0.40 by air; use air-mail stickers or red ink to get air-mail service. Surface rates to other countries are \$0.70 for the first ounce, and \$0.25 for each additional ounce. (Note that air mail is less expensive than surface mail for envelopes weighing one-half ounce or less.) Surface post cards cost \$0.35.

[You think this will cost you a lot; these postage increases will raise the cost of publishing The DX Bulletin by more than \$30,000 in 1991 alone!]

Worked All Zone Awards

Jim Dionne K1MEM, Worked All Zone award manager for CQ magazine, has awarded the first 12-meter mixed mode, the first 17-meter mixed mode, and the first 17-meter CW WAZ awards to Bob Peterson N4VZ. As of Jan. 28th, no The DX Bulletin reader has reported working all zones on CW since Jan. 1. The hold-out is Zone 34: Egypt, Sudan, and Libya. Maybe an enterprising DXer can talk Dennis STØDX into making a CW QSO.

DXCC Notes

ARRL Headquarters reports that the DXCC backlog is down to 3,214 unprocessed new applications and endorsements, as of Jan. 20. That week, they were working on new applications received Oct. 2, 1990, and endorsements received July 25.

At their recent meeting, the ARRL Board of Directors approved field checking of DXCC QSL cards. Actual implementation of this process has been turned over the ARRL Hq. Hq. will come up with a list of 250 DXCC countries that a DXer may submit to a field checker in an initial application for DXCC. Any DXer with any thoughts on how field checking of DXCC QSL cards should be handled should contact ARRL Hq.

And the new chairman of the DX Advisory Committee is Ted Pauck K8NA. Congratulations, Ted.
